

Pricing Proposal

Project: Pneu Speedy Mobile – Full-Stack Web Application

Prepared by: Sharjanan Staniculas

Date: 3-27-2025

Client/Stakeholder: Pneu Speedy Mobile

Project Overview

This project involves the development of a complete, mobile-first web application for Speedy Tire Service. The platform allows customers to easily book appointments, view live Google reviews, and receive email confirmations. It is fully responsive, scalable, and built with a modern tech stack for performance and reliability.

⚙️ Services Provided

Service	Description
UI/UX Design	Custom responsive interface for desktop and mobile with animations and language switching
Frontend Development	Built using React, TailwindCSS, and Material Tailwind
Backend (Serverless)	Firebase Functions for dynamic phone logic and Firestore data management
Email Integration	Integrated SendGrid to send automated appointment confirmation emails
Google API Integration	Displayed live customer reviews using Google Places API
Deployment & Testing	Fully deployed, tested, and optimized for performance and accessibility

Pricing Breakdown

Task/Feature	Est. Hours	Rate (CAD/hr)	Subtotal (CAD)
UI/UX Design & Responsive Layout	7 hrs	\$60	\$420
Firebase Backend Logic	6 hrs	\$65	\$390
